hCG Weight Loss Plan

HOMEOPATHIC WEIGHT LOSS!
LOSE UP TO A POUND A DAY*!

hCG Professional Formula is carefully designed to:

- ✔ **Reset the hypothalamus**
- ✔ **Support the body in the elimination of toxins**
- ✔ **Manage and regulate blood sugar levels**
- ✔ **Support metabolic functions**
- ✔ **Control appetite and reduce cravings**
- ✔ **Support the body's immune system in reducing viral load**
- ✔ **Minimize the effects of trauma and stress**

*This is an average. Individual results may vary.

What is hCG?

Human Chorionic Gonadotropin is a hormone that is produced naturally during pregnancy. In the 1950s a British endocrinologist named A.T.W. Simeons studied the effects of hCG on the body, discovering that it seemed to promote the burning of non-essential fat when administered to an individual on a low-calorie diet. His hCG diet **was later popularized by Kevin Trudeau in his book *The Weight Loss Cure "They" Don't Want You to Know About.***

What is hCG's role in weight loss?

There are three types of fat in the body:

- structural fat, which cushions the organs
- essential fat, which acts as the body's fuel reserve
- non-essential fat, which accumulates around the hips, thighs, waist and stomach.

Normally, when an individual is on a very low-calorie diet the body gets the additional energy it requires by metabolizing lean tissue (muscle) and structural and essential fat first, leaving the non-essential fat deposits. Dr. Simeons noticed that hCG reversed the order, encouraging the body to release its non-essential fat reserves.

How does the diet work?

hCG Professional Formula is a homeopathic hCG with supportive ingredients. It is administered in the form of liquid drops under the tongue, in conjunction with a low-calorie diet. The accompanying manual: *Your hCG Guide to Become Finally! Fit* describes the diet and includes recipes and meal plans to help you achieve success.

hCG Professional Formula

HOMEOPATHIC INGREDIENTS

✓ Oral hCG & Resetting the Hypothalamus Gland

hCG (Human Chorionic Gonadotropin)..... 12C, 30C, 60C, 100C
Human Chorionic Gonadotropin is a placental hormone which causes the diencephalon to stimulate the breakdown of non-essential (obesity causing) fat to help satisfy caloric needs prior to metabolizing sugar or essential fats. Under normal conditions non-essential fats are broken down after sugar and essential fats.

Hypothalamus 6X, 12X, 30X
The Hypothalamus sarcode includes the diencephalon which is stimulated by hCG to breakdown obesity causing non-essential fat before essential fat is metabolized.

Gambogia (HCA)..... 3X, 6X, 12X, 30X
Gambogia blocks the enzyme ATP Citrate Lyase to inhibit conversion of carbohydrates to fats, resulting in reduced fat storage.

✓ Detox and Drainage Support

Hepar Suis 8X
Liver sarcode is included to accentuate liver metabolic activity. A great deal of metabolic activity, including the breakdown of fats, occurs in the liver. It also aids the liver in eliminating waste products from fat metabolism (known as Detox and Drainage).

Renal Suis 8X
Kidney sarcode enhances the waste removal capacity of the kidney. Proper kidney drainage is an essential component of any weight loss program to eliminate heavy metals and other toxins which are released during fat loss.

✓ Glucose Management

Glucagon 30X
Glucagon is an important hormone involved in carbohydrate metabolism. Produced by the pancreas, it is released when blood glucose levels fall too low, causing the liver to convert stored glycogen into glucose. It is included homeopathically to encourage fats to be metabolized first so caloric needs are delivered by consuming fat instead of sugar.

Insulin 30X
Insulin is included to enhance fat metabolism by transfer of lipids from adipose tissue to the liver for mobilization as an energy source. Its homeopathic intent is to counter the effects of insulin at stopping the use of fat as an energy source and to reduce potential diabetic side-effects.

✓ Metabolism Support

ATP 30X
Adenosine-5'-triphosphate (ATP), is the energy unit output of the Citric Acid Cycle (Krebs Cycle) that transports chemical energy within cells for metabolism. It is used by enzymes and structural proteins in many cellular processes, including biosynthetic reactions, motility, and cell division.

Methyl B12 8X
Methyl B12, a form of Vitamin B12, is important to the Methylation metabolic pathway in the liver which metabolizes fat soluble toxins stored in fat cells. It is included to reduce reactions to toxins released during fat metabolism.

7-Keto DHEA 30X
7-Keto DHEA is a powerful weight loss nutrient with no stimulant effects. It increases metabolic rate by increasing T3 thyroid hormone output and increasing fat metabolism even while at rest. In preliminary studies on animals, 7-Keto DHEA stimulated the immune system, prevented muscle loss (anti-catabolic), reduced stress, increased the calorie-burning rate by activating thermogenic liver enzymes and improved memory more than DHEA or a placebo.

Sarcosine 30X
Sarcosine forms in muscle tissue during the muscle exhaustion, acidifying the body and decreasing the efficiency of fat metabolism. Homeopathically it is intended to increase acid metabolism, which has the effect of alkalizing the body and improving fat metabolism. General Symptoms: Tired feeling with muscular prostration, worse with exertion. Sore feeling all over, worse in afternoon. Restless at night. Difficulty in getting to sleep. Feeling tired in the morning.

✓ Appetite Control and Cravings

Graphites 12X, 30X, 60X
Graphites is a homeopathic remedy for treating obesity. Indications: excessive hunger, worse when hungry, active in stout patients who are often overweight, chilly and constipated.

fat intake and for treating all forms of addictions (including food addictions). Indications: desire for stimulants, craves spicy food, fat food, beer, loves fats and tolerates them well.

Nux Vomica 12X, 30X, 60X
Nux Vomica is a common homeopathic remedy to reduce cravings and desire for

Phytolacca Decandra 12X, 30X, 60X
Phytolacca Decandra is useful in treating obesity. Indications: intense thirst, between meals hunger pains.

✓ Immune Support and Viral Load Suppression

Asclepias Vincetoxicum 6X, 12X, 30X
Asclepias Vincetoxicum is included for viral suppression. Chronic viral loads are considered to be a cause of obesity. It is also indicated for dropsy, diabetes, great thirst and profuse urination.

Echinacea 6X, 12X, 30X
Echinacea is important for viral suppression in relation to obesity. It is indicated for acute auto infection, blood poisoning and septic conditions. This is a safe form of Echinacea for those who do not tolerate the herb.

✓ Trauma and Stress Management

Proteus Bach (Bach Paterson Bowel Nosode) 30C
Named for the famous flower essence physician, this homeopathic bowel nosode enhances the effectiveness of other homeopathic remedies in treating obesity.

Many patients who are obese deal with traumas of some type. Proteus Bach is also indicated for stress, trauma and nervous system support. It is a powerful remedy that has the combined effect of 14 standard homeopathic ingredients.
